MONEY'S Worth
Financial future still uncertain
\---

The financial media reported Thursday that the (im)mature Dow Jones Industrial Average (Dow) recorded triple-digit gains yesterday, indicating that the stock market and economy are recovering. However, the Dow was down in late-day trading. As of this writing, the Dow was up by nearly 100 points. Business leaders and financial experts are cautiously optimistic that a recovery will be gradual and slow. However, millions of jobs lost in the recession may not be avoidable, but knowledgeable enough to take steps to ensure a recovery.

Let's Talk Business
Study first step to improve transportation island-wide

The Aquidneck Island Planning Commission (AIPC) is planning a transportation study to determine the feasibility and necessity of specific projects that will have island-wide implications.

The study will have implications for beyond the island’s roads and vehicles. By identifying transportation needs for the island, the study will provide a focused list of potential recommendations.

AIPC has gathered new, updated data on the island’s transportation needs, and will conduct visits to the island’s communities to meet with the island’s residents and businesses.

As the study moves forward, public participation will remain crucial to the study’s success.

The study will examine various transportation options for the island, including air, rail, and sea transportation.
